Alabama: Why Arthritis Matters

Arthritis affects **33%** of the population in Alabama. That's **1,673,000** adults living with doctor-diagnosed arthritis in the state.

As of January 2023

- There are nearly **60 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **119,000** people in Alabama living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **450 pediatric rheumatologists**. That's about 700 kids for each doctor.

Over 24 million Americans experience activity limitations due to their arthritis.

- 954,000** adults in Alabama have activity limitations caused by arthritis
- Among all adults in Alabama with arthritis, **53%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

Adults with arthritis often have one or more chronic conditions.

- Mental Health:** Anxiety and depression affect **1/3** of U.S. adults with arthritis 45 years of age or older
- Diabetes:** **39.3%** of adults in AL with diabetes also have arthritis
- Heart Disease:** **41.5%** of adults in AL with heart disease also have arthritis
- Obesity:** **32.7%** of adults in AL who are obese also have arthritis

You can make a difference for people living with arthritis in Alabama by advocating for key priorities.

Federal

- Workforce:** Addresses the pediatric rheumatology workforce shortage through federal loan repayment programs.
- Congressional Arthritis Caucus:** Grows the bipartisan Arthritis Caucus, a forum to educate Members of Congress about the most pressing issues facing people with arthritis.

Alaska: Why Arthritis Matters

Arthritis affects **22%** of the population in Alaska. That's **158,000** adults living with doctor-diagnosed arthritis in the state.

As of January 2023

- There are nearly **60 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **23,000** people in Alaska living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **450 pediatric rheumatologists**. That's about 700 kids for each doctor.

Over 24 million Americans experience activity limitations due to their arthritis.

- 81,000** adults in Alaska have activity limitations caused by arthritis
- Among all adults in Alaska with arthritis, **45%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

Arthritis Foundation data has found:

- 100%** of arthritis patients reported experiencing pain in the last 7 days, with **75%** reporting that pain has impacted their day-to-day activities.
- 37%** of arthritis patients reported having trouble affording their out-of-pocket costs this past year. **54%** of those say they have incurred debt or suffered financial hardship because of it and **41%** said their health worsened.
- Prior authorization is consistently cited as the top health coverage-related challenge for people living with arthritis, and has led to negative health impacts.

We are helping people living with arthritis achieve their Ideal Model of Care by:

- Making healthcare more affordable by lowering out-of-pocket costs.
- Reducing administrative burdens to care, such as inappropriate use of prior authorization and step therapy.
- Addressing workforce shortages, ensuring the appropriate providers are available to treat people with arthritis, particularly in underserved areas.

- 100%** of arthritis patients reported experiencing pain in the last 7 days, with **75%** reporting that pain has impacted their day-to-day activities.
- 37%** of arthritis patients reported having trouble affording their out-of-pocket costs this past year. **54%** of those say they have incurred debt or suffered financial hardship because of it and **41%** said their health worsened.
- Prior authorization is consistently cited as the top health coverage-related challenge for people living with arthritis, and has led to negative health impacts.

We are helping people living with arthritis achieve their Ideal Model of Care by:

- Making healthcare more affordable by lowering out-of-pocket costs.
- Reducing administrative burdens to care, such as inappropriate use of prior authorization and step therapy.
- Addressing workforce shortages, ensuring the appropriate providers are available to treat people with arthritis, particularly in underserved areas.

Minnesota: Why Arthritis Matters

Arthritis affects **22%** of the population in Minnesota. That's **1,255,000** adults living with doctor-diagnosed arthritis in the state.

As of January 2022

- There are nearly **60 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **104,000** people in Minnesota living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **450 pediatric rheumatologists**. That's about 700 kids for each doctor.

Over 24 million Americans experience activity limitations due to their arthritis.

- 590,000** adults in Minnesota have activity limitations caused by arthritis
- Among all adults in Minnesota with arthritis, **37%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

Arthritis Foundation data has found:

- 100%** of arthritis patients reported experiencing pain in the last 7 days, with **75%** reporting that pain has impacted their day-to-day activities.
- 37%** of arthritis patients reported having trouble affording their out-of-pocket costs this past year. **54%** of those say they have incurred debt or suffered financial hardship because of it and **41%** said their health worsened.
- Prior authorization is consistently cited as the top health coverage-related challenge for people living with arthritis, and has led to negative health impacts.

We are helping people living with arthritis achieve their Ideal Model of Care by:

- Making healthcare more affordable by lowering out-of-pocket costs.
- Reducing administrative barriers to care, such as inappropriate use of prior authorization and step therapy.
- Addressing workforce shortages, ensuring the appropriate providers are available, particularly in undeserved areas.

North Dakota: Why Arthritis Matters

Arthritis affects **29%** of the population in North Dakota. That's **176,000** adults living with doctor-diagnosed arthritis in the state.

As of January 2023

- There are nearly **60 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **17,000** of the people in North Dakota living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **450 pediatric rheumatologists**. That's about 700 kids for each doctor.

Over 24 million Americans experience activity limitations due to their arthritis.

- 81,000** adults in North Dakota have activity limitations caused by arthritis
- Among all adults in North Dakota with arthritis, **33%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

Arthritis Foundation data has found:

- 100%** of arthritis patients reported experiencing pain in the last 7 days, with **75%** reporting that pain has impacted their day-to-day activities.
- 37%** of arthritis patients reported having trouble affording their out-of-pocket costs this past year. **54%** of those say they have incurred debt or suffered financial hardship because of it and **41%** said their health worsened.
- Prior authorization is consistently cited as the top health coverage-related challenge for people living with arthritis, and has led to negative health impacts.

We are helping people living with arthritis achieve their Ideal Model of Care by:

- Making healthcare more affordable by lowering out-of-pocket costs.
- Reducing administrative burdens to care, such as inappropriate use of prior authorization and step therapy.
- Addressing workforce shortages, ensuring the appropriate providers are available to treat people with arthritis, particularly in underserved areas.

- There are nearly **60 Million** American adults with doctor diagnosed arthritis in the U.S.
- 1 in 3** veterans has arthritis, which accounts for **14,000** of the people in Vermont living with arthritis
- There are approximately **300,000 kids** with arthritis in the U.S. but only about **450 pediatric rheumatologists**. That's about 700 kids for each doctor.

Over 24 million Americans experience activity limitations due to their arthritis.

- 77,000** adults in Vermont have activity limitations caused by arthritis
- Among all adults in Vermont with arthritis, **37%** have work limitations
- Arthritis in the U.S. has an economic burden of **\$304 billion** – made up of medical expenses and lost wages

Arthritis Foundation data has found:

- 100% of arthritis patients reported experiencing pain in the last 7 days, with 75% reporting that pain has impacted their day-to-day activities.
- 37% of arthritis patients reported having trouble affording their out-of-pocket costs this past year. 54% of those say they have incurred debt or suffered financial hardship because of it and 41% said their health worsened.
- Prior authorization is consistently cited as the top health coverage-related challenge for people living with arthritis, and has led to negative health impacts.

We are helping people living with arthritis achieve their Ideal Model of Care by:

- Making healthcare more affordable by lowering out-of-pocket costs.
- Reducing administrative burdens to care, such as inappropriate use of prior authorization and step therapy.
- Addressing workforce shortages, ensuring the appropriate providers are available to treat people with arthritis, particularly in underserved areas.
